## Marketing description

BF Games is firing up all-new spicy reels, and they're coming in HOT! Burning Slots Cash Mesh is the latest title to join the Burning Slots family, sporting a 5-reel, 3-row setup and 5 fiery ways to keep the heat turning up.

One of the most iconic features of the Burning Slots Cash Mesh slot is, as the name implies, the Cash Mesh feature! To trigger it, you will need to land five or more Coin symbols, each having predefined values or labels indicating a Jackpot or Bonus. It first starts with three respins, but when a new Coin symbol hits, the respins value resets back to three. Cash Mesh spins keep the rewards going on and on until the respins are finished or until all positives are filled with Coin symbols. Once all the respins are spun around, the Coin values are added up and paid out!

It is even possible to land a flaming-hot Full House in Burning Slots Cash Mesh!

Whenever 15 Coin symbols fill up the reels during Cash Mesh, you will snag an additional x2 Full House Multiplier on your total Coin symbols value — phew!

What if you land a Coin symbol with a Jackpot or Bonus symbol during Cash Mesh?

That would call for an extra win, of course! The Mini Bonus grants you double your bet and the Minor Bonus offers triple your bet stake. The Major and Grand Jackpots are flames that only get bigger and bigger after each spin, and each player contributes to

that! It can be won by anyone at any time, with their current values shown on the labels above your gameplay.

No sizzling hot slot comes without a side of Scatters and Wilds, and Burning Slots Cash Mesh is no exception! The Horseshoe Scatter can appear on the first, third and fifth reel only, and landing three of them forms a winning combination. On the other hand, Clover Wilds appear on the second, third and fourth reels and replace any other symbols except for Scatters and Bonus symbols.
