

Joker's Vault

Joker's Vault is a 5-reel, 3-row video slot with 20 fixed paylines. The objective is to land as many identical symbols as possible along a payline on adjacent reels. Winning combinations start on the first reel on the left and run along an active payline to the last reel on the right. After a win, the winning symbols and the SCATTER symbol disappear and symbols cascade down. Only the highest winning combination is paid per line. Wins on different paylines are added.

Scatter

SCATTER symbols can appear on reels 1, 3 and 5. Only one SCATTER can appear on each reel. It is not possible to generate winnings by combining SCATTER symbols. Landing three SCATTER symbols will activate the PICK AND WIN bonus.

Wild

The WILD symbol appears on reels 2, 3 and 4 and substitutes for all other symbols except for the SCATTER symbol. Only one WILD can appear on each reel. If the WILD symbol appears on the winning line, it expands and covers the full reel transforming into EXPANDING WILD. The WILD symbol expands only the first time when it appears on the reels during each spin. The WILD only expands when a win occurs. If the expanded WILD symbol remains on the screen after cascade, it does not expand on the other positions of the reel.

Pick and win

Landing three SCATTER symbols on the reel will activate the PICK AND WIN bonus. There are 3 different randomly shuffled values closed in vaults. One vault is empty with no win. Another one contains a bet multiplier of range 5×-20× and the other one contains a bet multiplier of range 25×-500×. The player can choose one vault shown on the screen. The number chosen by the user is the value which user wins. The win will be added to the player's balance.

Multiplier

The win multiplier increases by 1× with every new cascade. Cascade multiplier increases with each consecutive win to: ×2, ×3, ×4, ×5, ×6 and forth. The multiplier will be applied on the all cascade wins except the win by PICK AND WIN bonus.
