Marketing description

Get ready for a slot that pulls you in — literally. Magnetic Coins by BF Games blends classic 3-reel charm with modern feature-packed excitement. With 5 fixed paylines and a clean 3x3 layout, the gameplay is easy to follow, but the surprises come fast. The Wild symbol can land on any reel, standing in for other symbols and creating its own winning combinations, while the true magic begins when the Magnet symbol hits.

The Magnet appears only on the second reel and is the heart of the action. It collects all Coin and Reward symbols from reels one and three, adding their value directly to your winnings. Coin symbols award multipliers from 1x to 15x your bet, while Reward symbols bring jackpot-style prizes — from Mini (20x) to the massive Grand (1000x). Even more action kicks off when three bonus symbols land, launching the Magnet Bonus. In this hold-and-win style feature, only bonus symbols appear, and any Magnets that land stay sticky while collecting everything in sight over a series of respins.

And it doesn't stop there. The Pile of Gold feature can randomly trigger in the base game, adding enough bonus symbols to activate the Magnet Bonus unexpectedly. For players looking to up the ante, the Extra Chance feature can be toggled on, doubling the odds of triggering Pile of Gold at the cost of a 40% bet increase — all while keeping your win potential untouched. Magnetic Coins is simple on the

surface, but beneath its polished exterior lies a web of magnetic potential just waiting to be unleashed.
