Game description

In the realm of the north, where icy winds howl and untamed seas rage, a legendary slot awaits brave adventurers: Raiders of the North. This 5-reel, 4-row saga unveils its secrets in the hallowed Treasure Island mode, where an extra row is revealed, promising riches beyond measure. The journey begins with the base game, where wins carve their path from left to right across adjacent reels, though beware the elusive scatter symbols. With up to 1,024 ways to conquer, each spin tells a tale of valour and fortune.

Witness the majesty of the Flying Wild, embodied by the divine Valkyrie symbol. She graces the reels, bestowing her favour upon the worthy, but never alongside the cunning Reel Wild. Should fate decree, the Flying Wild descends at random, replacing lowly symbols with treasures of higher worth, ensuring victory for the fearless.

To unlock the secrets of the Treasure Island, gather 50 Ship symbols scattered across the waves. With the unlocking of the fourth row, the game transforms, welcoming the powerful Reel Wild to its midst. This wild force spans reels two, three and four, bringing the promise of untold fortunes as it substitutes for all symbols, save for the elusive scatter and ship.

Set off on your Free Games quest, where 10 Free Spins await those who uncover three Scatter symbols on reels one, three and five. Amidst the chaos, seek the keys to greater glory, for every trio claimed grants two extra Free Spins and augments the global Free Spins multiplier, reaching heights of x5. Yet, in this realm, the Flying Wild slumbers, while the Reel Wild reigns supreme.

For those who dare to seize destiny, the Buy Feature offers passage to Free Spins without delay. Purchase the chosen bet, beckoning forth the promised spins, with the cost rising as the mysteries of the additional row are unveiled.
