Game description

Welcome to Ruby Joker Dice, BF Games' bold new release where glitz, wit, and chaos collide on a stage set with rubies, reels, and a wild-eyed joker who never plays by the rules. Behind the rich jewel tones and sparkling lights lies a classic 5-reel, 3-row setup with 10 fixed paylines, offering a fast-paced, polished gameplay experience where every spin feels like a performance.

The action starts with the Star Scatter - a shimmering symbol that can land on any reel. Hit three or more and you're in for a win, but there's a twist: Scatter and Wild symbols never appear together on the same reel, keeping you on your toes with every spin. The Joker wild, appearing only on reels 2, 3, and 4, is a showstopper in his own right. When he lands on a winning line, he expands to fill the entire reel, transforming into an expanding wild and raising the curtain on potentially dazzling payouts.

But that's not all. The Ruby Bonus symbol brings its own touch of luxury. It can only appear on reels 1, 3, and 5, and landing all three triggers a special win; a sparkling reward worthy of the game's namesake gem.

Feeling brave? Activate the Joker Spins feature, where you can guarantee 1, 2, or even 3 expanding wilds per spin. Choose your level of thrill: 1 wild costs 6x your current stake, 2 wilds cost 20x, and for maximum madness, 3 wilds cost 65x. Turn the feature off any time, or simply toggle between levels to tailor your chaos. Wins are always

calculated the same, whether you're playing with Joker Spins on or off - the real question is, how much glitter can you handle?
