

Werewolf Hour

Game description

When night falls, the hunt begins in Werewolf Hour! Step into a shadowy forest where glowing eyes peer through the mist and the full moon awakens ancient forces. Every spin draws you closer to the heart of the werewolf's domain, where danger and mystery lurk behind every tree. Do you dare face the midnight hour? The creatures of the dark are waiting...

Marketing description

The full moon rises, casting an eerie glow over a dense, haunted forest. You've stepped into Werewolf Hour, a thrilling 5-reel, 3-row video slot from BF Games where every spin draws you deeper into the werewolf's lair. The base game begins with 243 ways to win, where matching symbols on adjacent reels from left to right form winning combinations, but the real power of this slot comes alive when midnight strikes.

Werewolf Hour unfolds in 12-spin cycles. The first 11 spins are standard game rounds where you begin collecting Bonus symbols—either the shimmering Crystal or the fierce Gold Werewolf—on the middle three reels. These symbols fuel the Collect Feature, gradually unlocking the upper reel segments above each column. Each reel has its own progress tracker, and once five Bonus symbols are collected for a column, that upper reel segment becomes fully unlocked. These upper slots remain locked until the 12th spin, meaning every bonus you collect is preparing you for something bigger.

That “something bigger” is the Midnight Spin, the 12th spin in the cycle. This is when the game transforms, both visually and mechanically. The ways to win can expand up to a massive 4608, and the unlocked upper reels come into play. Now, not only do you have access to regular symbols, but also exclusive ones: the Jewel, Cash, and Extra Spins symbols. However, these special symbols only become active on fully unlocked reels, so every Bonus you collect in the lead-up matters.

The Jewel symbol is a shimmering game-changer during the Midnight Spin. When it lands on a fully unlocked reel, it can transform into instant Rewards—Mini, Minor, Major, or Grand—or grant Extra Spins, extending your time in the bonus round.

Cash symbols also make their appearance during the Midnight Spin, offering direct payouts ranging from 1× to 5× your current bet. Again, these symbols only come to life on reels you've unlocked, adding extra incentive to build those bonus meters during the base game.

To push your luck even further, the Extra Spins symbol can appear during the Midnight Spin, awarding up to 3 additional Midnight Spins at a time. Crucially, all unlocked reels and game states carry over into these extra spins, giving you more chances to land Jewels and Cash rewards before the cycle resets.

Of course, lurking in the shadows is the Wild symbol, which can appear on the middle three reels and substitute for all standard symbols (but not Cash, Bonus, or Jewel). These wilds bring surprise wins and help form strong combinations just when you need them most.

When the final Midnight Spin ends, the reels return to their standard state, and a new cycle begins—complete with a fresh chance to collect bonuses, unlock reels, and chase those supernatural rewards. With its innovative cycle mechanic, chilling atmosphere, and layered bonus structure, Werewolf Hour doesn't just bring the thrill—it howls with it.

Game phrases

- The hunt begins at midnight!
- Unlock the reels. Unleash the beast.
- Collect. Transform. Win big.
- Face the fangs of fortune!
- Prepare for 12-spin cycles that build toward a thrilling Midnight Spin with expanded reels and supernatural rewards.

- Gather Crystal and Gold Werewolf symbols to unlock upper reels and access powerful bonus symbols.
- When the Midnight Spin hits, Jewels and Cash drop with instant rewards and extra spins—if you dare to unlock them.
- From eerie base game spins to adrenaline-pumping bonus rounds, Werewolf Hour delivers a chillingly wild experience.
